Finn’s Incredible World Map: Continents and Oceans

Grab your passport and join Finn the dolphin on a giant blue adventure around the globe!

- **There are seven continents on Earth: Africa, Antarctica, Asia, Europe, North America, Oceania, and South America.**
- **The five oceans of our world are the Pacific, Atlantic, Indian, Southern, and Arctic Oceans.**
- **A continent is a very large area of land, while an ocean is a vast body of salt water covering most of our planet.**
- **The Equator is an imaginary line that circles the middle of the Earth, dividing it into the Northern and Southern Hemispheres.**
- **Antarctica is the coldest continent, located at the very bottom of the globe, and is covered in a thick layer of ice.**

> *Did you know? Did you know? Even though we call them separate oceans, they are all actually connected! If you were a dolphin like Finn, you could swim from one side of the world to the other without ever hitting a wall.*
