Discovering North America with Finn the Dolphin

Dive into discovery! Explore the wonders of the North American continent.

- **North America is the third-largest continent in the world, stretching from the Arctic Ocean in the north to the Isthmus of Panama in the south.**
- **The continent is home to three massive countries: Canada, the United States of America, and Mexico, along with the islands of the Caribbean and Central American nations.**
- **The Rocky Mountains form a major physical feature, running over 3,000 miles from British Columbia in Canada down to New Mexico in the United States.**
- **The Great Lakes, located on the border between Canada and the USA, contain roughly 21% of the world's surface fresh water by volume.**
- **The Mississippi-Missouri river system is one of the longest in the world, providing essential water for agriculture and transport across the heart of the continent.**
- **North America's diverse biomes include the frozen Arctic, temperate grasslands known as prairies, and arid deserts in the south-west.**

> *Did you know? Did you know that North America is the only continent that has every single type of climate? From the freezing Arctic tundra in the north to the tropical rainforests in the south, the landscape changes dramatically as you travel across its vast expanse!*
