Sustainability: Protecting Our Precious Planet

Be a Planet Protector: Small Changes, Big Impact!

- **Sustainability means meeting our own needs without compromising the ability of future generations to meet their own.**
- **Renewable energy comes from sources that do not run out, such as wind, solar power, and moving water.**
- **Reducing the amount of electricity we use at home helps to lower our carbon footprint.**
- **Recycling materials like glass, paper, and aluminium reduces the need to mine for new raw materials.**
- **Buying food from local farms reduces 'food miles', which is the distance food travels from the field to your plate.**
- **Protecting biodiversity ensures that different types of plants and animals can continue to thrive in their natural habitats.**

Did you know? Did you know that Finn the dolphin travels across our oceans and sees how much plastic waste enters the water? By choosing to reuse items instead of throwing them away, we can help keep his ocean home clean and safe for all marine life!

Key vocabulary: Renewable energy · Carbon footprint · Biodiversity · Conservation · Finite resources · Sustainability
